

Pharmacist Prescriber Practice Plan considerations

Date

Employing organisation

Collaborative team leader

Your role within the team

Role and functions of other team members

Days or times to be spent as a pharmacist prescriber (e.g. if running a specific clinic)

Mentoring and Clinical Governance:

- Who will provide mentoring? How will it be provided?
- Who will provide supervision? How will it be provided?
- Any additional mentoring from other team members or relevant external sources

Prescribing practice

- Clinical areas you will prescribe in / types of patients / conditions seen
- Medicines or medicines groups to be prescribed
- Referral, documentation and communication processes
- Identifying patients for clinics, monitoring and follow up, and measurable outcomes
- How access to patient records will be managed
- Process for ordering diagnostic tests
- Protocol for repeat prescribing
- Types of circumstances / situations when you would prescribe “independently”, or when you would discuss your prescribing decision with the patient’s lead medical practitioner
- Types of circumstances/ situations when you would refer back to the patient’s lead medical practitioner

Management of potential conflict

Continuing education process

- Peer review
- CPD process if changing team or practice area

Sign-off – the practice plan will need to be signed-off and dated by the DMP / clinical lead
